DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The rejection of claims 1-11 under 35 U.S.C. 112, second paragraph, has been withdrawn in view of Applicant's amendments and remarks.

Claim Rejections - 35 USC § 102

2. Claims 1-8, 10, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al. (US 5,166,007).
Examiner maintains the rejection.

Claim Rejections - 35 USC § 103

3. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smith.
Smith teaches that which is disclosed above regarding the use of UV irradiation to cure
Examiner maintains the rejection.

Response to Arguments

4. Applicant's arguments filed 3/24/2003 have been fully considered but they are not persuasive.

Applicant argues that Smith is not appropriate for spot-repairing coated surfaces of automobiles to achieve a smooth, bright, optically flawless finish.

Art Unit: 1762

Examiner notes that Applicant's claims are not directed to vehicle repair. Nor do

Applicant's claims require smooth, bright, optically flawless finishes.

Additionally, Smith does teach, throughout his disclosure, the use of a patch for repairing vehicles. A patch qualifies for use in spot-repairing.

Applicant argues that Smith fails to teach a backing film that is not a fabric, whereas the instant application does not require the use of a fabric that may be impregnated with resin.

Examiner notes that the "comprising" language of Applicant's claims is open to the use of fabric backing films impregnated with resin. Such backing films are not excluded by Applicant's claims.

Applicant argues that Smith does not teach that the use of his method results in only the coating composition remaining on the repaired surface.

Examiner notes that Applicant's claims do not require this limitation.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
